THE COMPLETE JAVASCRIPT COURSE

DATA STRUCTURES OVERVIEW

SOURCES OF DATA

1 **From the program itself:** Data written directl

2 **From the UI:** Data input from the user or dat

3 **From external sources:** Data fetched for exa

ARRAYS

VS.

SETS

```
tasks = ['Code', 'Eat', 'Code'];
// ["Code", "Eat", "Code"]
```

```
tasks = new Set(['Code', 'Ea
// {"Code", "Eat"}
```

👉 Use when you need **ordered** list of values (might contain duplicates)

👉 Use when you nee with **unique** values

👉 Use when **high-per**
